

Queen posts can be straight or curved as indeed can braces.

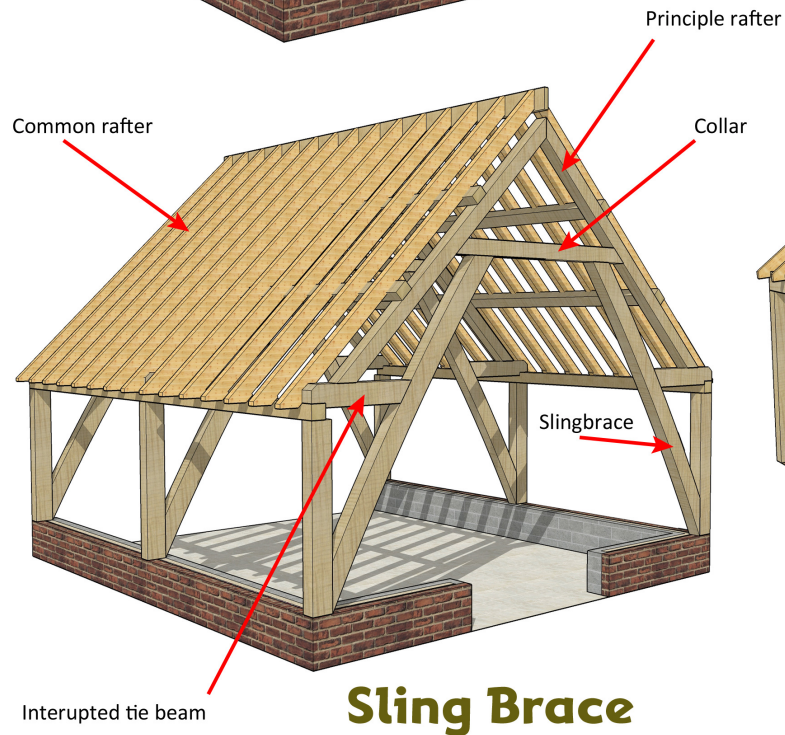

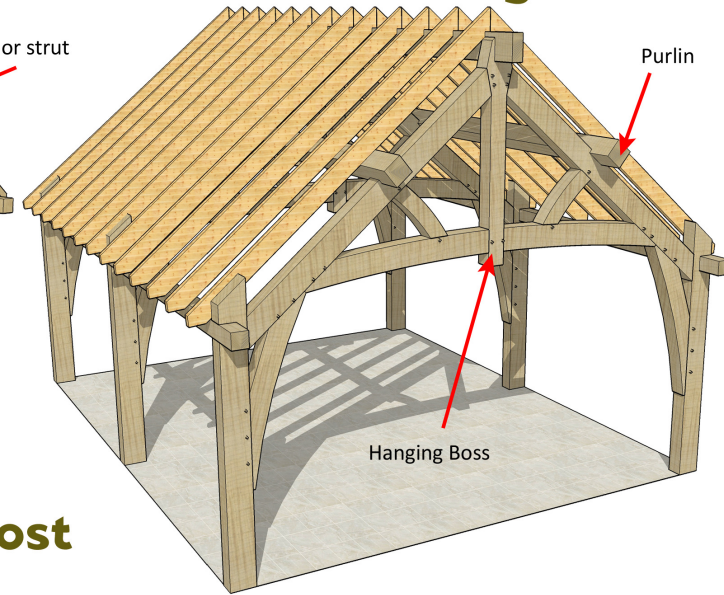

Queen Post

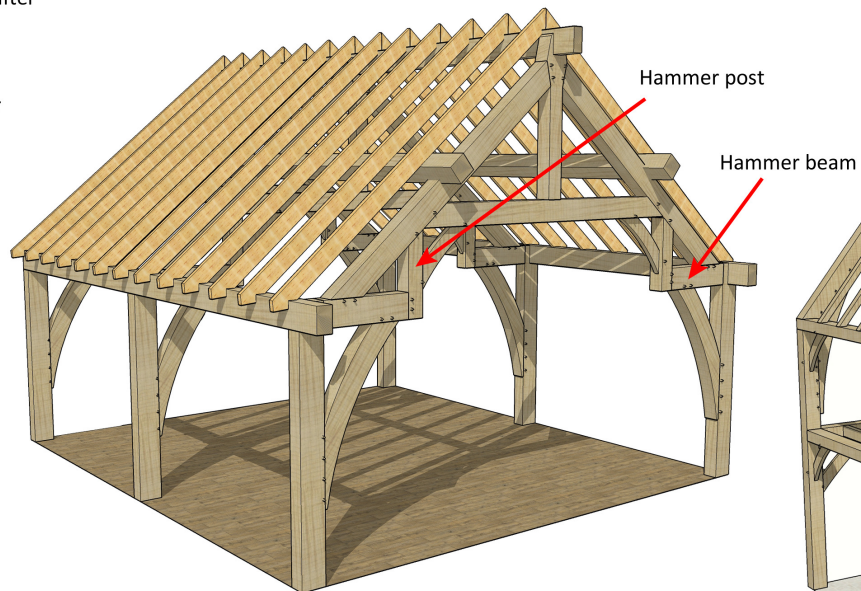

Braced King Post

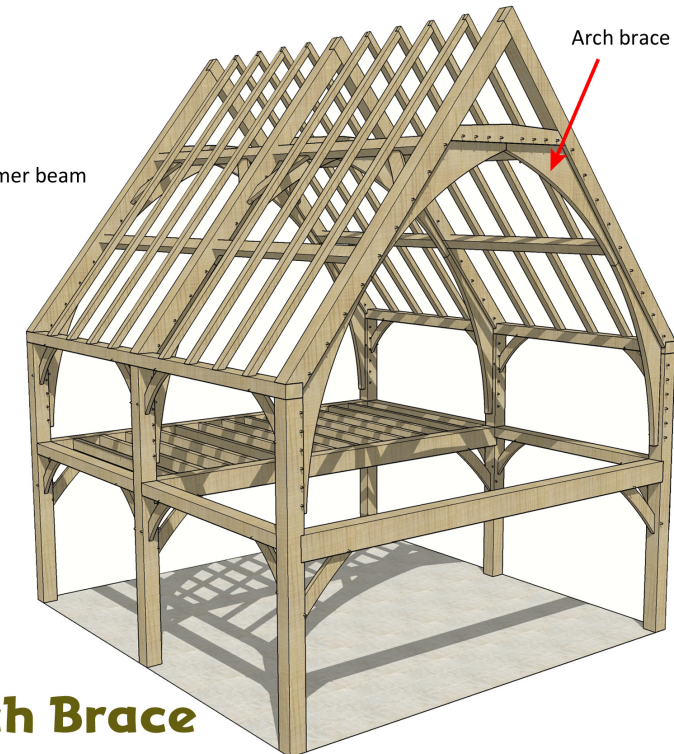

Raised Tie King Post

Sling Brace

Hammer Beam

Arch Brace

These are just a few truss designs, there are many more and you can also have a combination of two or more truss styles to create ever more complicated frames. Hammer beam and sling brace trusses are generally used for larger spans where it's not possible to bridge the span with a single timber tie beam.
